Portfolio

EDUCATION

Bachelor of Technology in Computer Science and Engineering
GLA University, Mathura, Uttar Pradesh

2022- 2026
CGPA: 7.97

PROJECTS

- **BookNest – Full Stack E-Commerce Platform** | *Spring Boot, Angular, Redis, RabbitMQ, Microservices* **April 2026**
 - Developed a full-stack e-commerce platform using Spring Boot microservices and Angular with secure RESTful APIs and scalable backend architecture.
 - Implemented JWT-based authentication and role-based access control (RBAC) to secure user access and inter-service communication.
 - Integrated Redis caching and RabbitMQ for improved performance and asynchronous communication.
 - Implemented unit testing with JUnit and Mockito, along with SonarQube integration.

Link: [GitHub](#)
- **Ensemble-Based Fake News Detection System** | *MERN, Python, NLP, ML, Transformers (DistilBERT)* **March 2026**
 - Built a full-stack AI-powered fake news detection system using MERN stack with a Flask-based REST API for ML inference.
 - Designed a hybrid NLP pipeline on ~1,00,000 articles using TF-IDF models and DistilBERT for fake news classification.
 - Improved prediction accuracy using a stacking ensemble meta-classifier and enhanced interpretability with SHAP and LIME.
 - Developed backend APIs with Node.js/Express and enabled real-time predictions via a web interface.

- **CodeReview** | *Node.js, Express.js, React.js, Gemini 2.5 Flash Api* **June 2026**
 - Built a full-stack AI code review platform using React, Node.js/Express, and MongoDB with JWT & Google OAuth authentication, supporting 20+ languages across 4 review modes (Full, Security, Performance, Quick).
 - Integrated Google Gemini 2.5 Flash API for AI-powered code reviews, contextual chat, and secure input validation.
 - Designed secure REST APIs with rate limiting, bcrypt password hashing, automated review retention, and MongoDB-backed review history management.

EXPERIENCE

- **Software Engineer Trainee – Capgemini** **December 2025 – May 2026**
 - Worked on Java, Spring Boot, microservices, and backend development concepts.
 - Built REST APIs and implemented authentication and database integration.
 - Practiced problem-solving and software development workflows.

SKILLS

- **Languages:** Java, JavaScript, TypeScript, Python
- **Frontend:** Angular, React, HTML, CSS
- **Backend:** Spring Boot, Spring Security, Node.js, Express.js, REST APIs
- **Databases & Cache:** MySQL, MongoDB, Redis
- **Security & Auth:** JWT, OAuth2
- **Microservices & Tools:** Microservices, API Gateway, Eureka Server, RabbitMQ, Postman, Git
- **Core CS Concepts:** Data Structures & Algorithms, OOP

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Foundations Associate | [Link](#)
- Databases and SQL for Data Science with Python by IBM | [Link](#)

ACHIEVEMENTS

- Secured 3908th rank in TCS CodeVita in Season 12 | [Link](#)
- Solved 800+ DSA problems across coding platforms including LeetCode, Codeforces, and CodeChef etc.
